MLE on Research Integrity

Research integrity is a foundation of excellent science and the cornerstone of societal trust in researchers and research institutions. Advancing research integrity across Europe is of the utmost importance to ensure the high quality of science, including reproducibility of research results, and to ensure a fruitful relationship between science and society.

The MLE will focus on the exchange of national practices regarding four priority areas for advancing in the research integrity field, namely, promoting positive incentives, spreading research integrity culture among stakeholders through communications and dialogue, enhancing training in all stages of the research careers and stimulating processes and structures that support research integrity. These four priority areas will be analysed from three different perspectives: institutional, national and cross-border levels.

Date 15 October 2018 to 15 October 2019

Exercise type Mutual Learning

Geo coverage Austria Bulgaria Denmark Estonia Finland France Greece Ireland Lithuania Luxembourg Moldova Norway Spain Sweden
